Flann Waveguide Bends are available in E and H plane configuration with an angle of 90°. Bends of 30°, 45° and 60° can be supplied to special order. Bends in the range WG10 to WG19 inclusive utilise a mitred casting with a VSWR typically better than 1.05. Bends from WG20 to WG28 inclusive are sections of waveguide which are precisely bent to the required angle with a VSWR of typically 1.05 ...

### **Waveguide E and H Plane Bends Series 460 / 470 - Flann**

This software package seeks to improve waveguide filter and diplexer design and decrease performance variations without creating overly stringent manufacturing tolerances. The accompanying manual helps the reader to predict performance parameters before building costly prototypes.
