Conclusion. Relating this to the potato chips: basically, as the concentration of salt in each solution increases, the water in that solution is less able to move to the potato, causing water from the potato to move to the solution, decreasing its length, weight and width.

## How does the concentration of salt solution affect osmosis

Osmosis is diffusion of water across a semi-permeable membrane. Salt is too big to pass through a cell membrane, but water molecules can fit.

27th October 2017 As readers of this blog will know, for many years I have pursued the idea that "stress" was the primary cause of cardiovascular disease. Actually, it is strain. Stress is the force applied, strain is the effect that stress produces. For the sake of simplicity, I will just use the word stress.
