The dynamic range of an audio passage is the ratio of the loudest signal to the quietest signal. For signal processors the magnitude of the power supply voltages restricts the maximum output signal and the noise floor determines the minimum output signal.

Dynamics Processors -- Technology & Applications

A Practical Attack against MDM Solutions. Spyphones are surveillance tools surreptitiously planted on a users handheld device. While malicious mobile applications mainly phone fraud applications distributed through common application channels - target the typical consumer, spyphones are nation states tool of attacks.

Applications of Real-Time PCR/qPCR Assays. Real-time PCR/qPCR assays have become the tool of choice for the rapid and sensitive determination and quantitation of nucleic acid in various biological samples, with diverse applications such as gene expression analysis, the detection of genetically modified organisms in food, and cancer phenotyping.
