

remote sensing with imaging pdf

Remote sensing is the acquisition of information about an object or phenomenon without making physical contact with the object and thus in contrast to on-site observation, especially the Earth.

Remote sensing - Wikipedia

The Centre for Remote Imaging, Sensing and Processing (CRISP) is a research centre of the National University of Singapore established with funding from the Agency for Science, Technology & Research (A*STAR) of Singapore.

CRISP

Remote sensing techniques in archaeology are an increasingly important component of the technical and methodological tool set available in archaeological research. The use of remote sensing techniques allows archaeologists to uncover unique data that is unobtainable using traditional archaeological excavation techniques.

To secure uninterrupted distribution of electricity, effective monitoring and maintenance of power lines are needed. This literature review article aims to give a wide overview of the possibilities provided by modern remote sensing sensors in power line corridor surveys and to discuss the potential and limitations of different approaches.

Remote sensing methods for power line corridor surveys

RSPSoc members can publish their article open access at a 70% discount on the standard article publishing charge.

Remote Sensing Letters: Vol 10, No 1 - Taylor & Francis

The Golight remote controlled thermal imaging infrared camera system with 6 inch LCD monitor is a small thermal sensing camera mounted in a remote controlled frame that can detect heat differentials between 32 - 240 Fahrenheit.

Remote Control Thermal Imaging Camera System - 12V

Abstract. Vegetation Indices (VIs) obtained from remote sensing based canopies are quite simple and effective algorithms for quantitative and qualitative evaluations of vegetation cover, vigor, and growth dynamics, among other applications.
